Each System is
Pre-Configured &
Ready to install

The *AutoRay* offers the most essential features required by busy sites to produce universal exchange medical CDs & DVDs for referring physicians and patients alike. The *AutoRay* was designed with the end-user in mind, thereby creating a friendly and intuitive graphical user interface. Each application has been tested with 'non-technical' users in real world, everyday applications. The result is a simple, fast and reliable system.

Each pre-configured *AutoRay* system includes the MSI Touch-screen PC, keyboard and mouse to provide true functionality. Standard features include the ability to merge patient studies, PACS Query & Retrieve, Auto-Burn CD/DVDs with spanning, DICOM Viewer of your choice, DICOM Image Importer and the option of a touch-screen interface.

Our engineers have over 100 years of combined DICOM programming experience. Current installs are located throughout the US, Australia and Canada, as we are quickly becoming the choice for professionals in leading medical institutions.
